I am a JavaScript Developer that focuses on frontend frameworks such as React. I have a passion for Design Systems, Web Accessibility. To grow my skills I focus on building a MERN (React, Node, Express and MongoDB) stack application for a nonprofit called **Event Management**.

### Skills:

**Comfortable:** JavaScript, ES6, React.js, Node.js, Express.js, MongoDB, Mongoose, Bootstrap.

**Familiar:** Redux, Firebase, Typescript, Next.js, Tailwind.

**Tools:** GitHub, Heroku, Netlify, VS Code, Chrome Dev Tools, Vercel.

### Personal Projects:

#### **Event Management (MERN) [Live](#) | [GitHub](#)**

- Admin user create event service, manage service
- Customer book any service, review that service and see their order status.
- Online payment processing using STRIPE.

**Technologies:** JavaScript (ES6), React JS, Node JS, Mongo DB, Firebase Authentication, Stripe

#### **Easy Essay Witting [Live](#) | [GitHub](#)**

- Admin user can dynamically changes home page.
- Implemented similar affiliate marketing functionality (user can refer another user)
- Online payment processing using STRIPE.

**Technologies:** Next.js, Express.js, Mongoose, Firebase, Stripe

#### **Virtual Expert [Live](#) | [GitHub](#)**

- Admin user can dynamically changes all pages and create, manage service card.
- Implemented Invoice functionality.
- User can order any service.

**Technologies:** Next.js, Express.js, Mongoose, Email.js

### Academic Qualifications:

MSc in Computer Science (2022)

American International University – Bangladesh
